Plugin Settings

## Subscription removing options

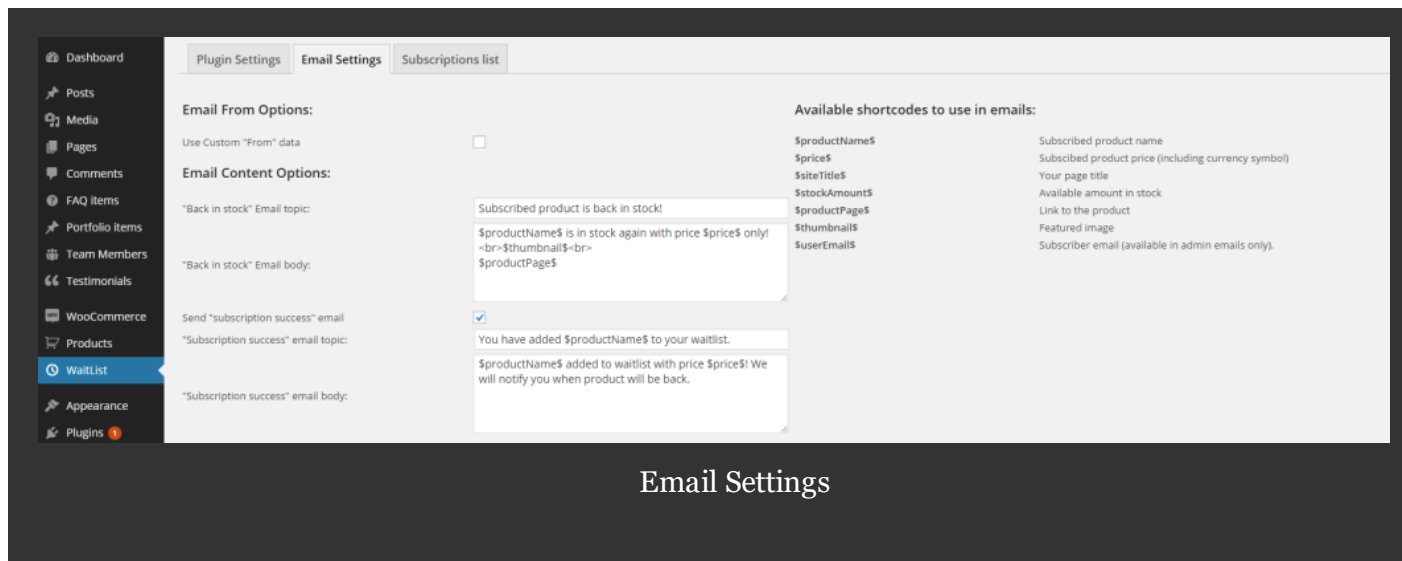

- **Select waitlist un-subscribe page** – select for choosing on which page should or not be displayed form for removing user from Waitlist Database. (Disabled, MyAccount, Product Page, both)
- **Unsubscribe button text** – text to be displayed on button displayed on page chosen by “Select waitlist un-subscribe page” option.
- **Removed from waitlist** – text to be displayed after successful user’s remove from waitlist.
- **Minimum stock amount to send “item is back” message** – waitlist email is not sent if on stock returns less than this value
- **Enable plugin data to shop manager** – decides if shop manager can view and manage plugin data
- **Remove data on plugin deletion** – removes all options from WP database on plugin deletion
- **Display waitlist data on WooCommerce product page edit** – determines if option for disabling subscription for specific item and overall amount of subscriptions for specific item should be displayed when editing WooCommerce product inventory

- **Enable postponing emails option in product edit page** – adding new option to product inventory page – this option will let you delay send Back In Stock message. You can view or edit

queue to adjust and decide who to send email or when to do it.

## 0.1 Email Settings

Email Settings

- **Use custom from data** – determines if plugin should use WooCommerce “from” data or custom data provided by user. This is used for emails displayed in email “from” cell. By default its sender’s email + name.
- **Back in stock email topic and body** – content of email sent when item returns on stock.
- **Send subscription success** – enabling/disabling sending email right after subscriber made subscription

- **Subscription success email topic and body** – content of email sent right after subscriber made subscription

## Advanced Email Options

You can use following placeholders to full customize your email sent by Waitlist. Plugin will replace it with correct data.

### Full list of available placeholders:

- \$productName\$
- \$price\$
- \$siteTitle\$
- \$stockAmount\$
- \$productPage\$
- \$thumbnail\$
- \$variation\$
- \$userEmail\$

Subscription list

Subscription List is a database divided on subscribers notified and not notified about products out of stock and items mostly added to Waitlist. Displays:

- subscriber mail,
- product featured image,
- product name,
- group name,
- variation name,

- category name,
- product type (variable, simple or grouped)
- date, when it was added to waitlist.

Notified subscribers list shows also notify date (then user is notified about product back in stock) and item bought date (if user has bought subscribed item).

Most Waitlisted displays 20 items mostly added to waitlist with subscriptions count for specific item.

### **You can sort data by:**

- subscriber,
- product,
- group,
- variation,
- date.

### **Available actions:**

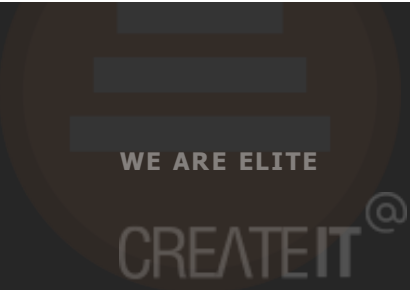

- delete or export checked elements,
- export to .csv file.

## 0.1 Extension points

Options filter – to change specific option via wordpress add\_filter hook simply use:

```
add_filter('ctWaitlist_options_ . $optionName', 'change_option');
function change_option($value){
return $value = 'New option value';
}
```
